

Which of the following is hypertonic relative to a solution consisting of 98% water and 2% glucose?

A A solution that is 99% water and 1% glucose.

B A solution that is 95% water and 5% glucose.

C A solution that is 98% water and 2% glucose.

A solution that contains 5% glucose is hypertonic relative to a solution that contains 2% glucose.

Answer **B**.
