

Hemophilia A is an X-linked recessive trait. If a man's mother is homozygous for the normal allele and his father is a hemophiliac, what are his chances of having hemophilia?

- A 0%
  - B 25%
  - C 50%
  - D 100%
- 

The allele for hemophilia is on the X chromosome, which a male inherits from his mother.

Answer **A**.
