

In the function $f(x) = mx + b$, m is the _____ of its graph, and b is the y -coordinate of the _____.

- A) slope ... x -intercept
 - B) slope ... y -intercept
 - C) angle ... x -intercept
 - D) angle ... y -intercept
-

In the function $f(x) = mx + b$, m is the slope of its graph, and b is the y -coordinate of the y -intercept.

Answer **B**
