

An alternate formula for compound interest is $FV =$ _____.

- A) $P(1 + i)^n$
- B) $P\left(\frac{i + r}{k}\right)^{kt}$
- C) $PV(1 + i)^{kt}$
- D) $PV(1 + i)^n$

An alternate formula for compound interest is $FV = \underline{PV(1 + i)^n}$.

Answer **D**.
