

The graph of $x = a(y - 2)^2 + 3$ ($a > 0$) is a _____ with vertex at _____ that opens to the _____.

- A) parabola ... (3,2)...right
 - B) parabola ... (2,3)...right
 - C) parabola ... (3,2)...left
 - D) parabola ... (2,3)...left
-

The graph of $x = a(y - 2)^2 + 3$ ($a > 0$) is a parabola with vertex at (3, 2) that opens to the right.

Answer **A**
