

The elliptical graph of $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ has x -intercepts of _____ and y -intercepts of _____.

- A) $(a, 0) \dots (0, b)$
 - B) $(0, a) \dots (b, 0)$
 - C) $(\pm a, 0) \dots (0, \pm b)$
 - D) $(0, \pm a) \dots (\pm b, 0)$
-

The elliptical graph of $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ has x -intercepts of $(\pm a, 0)$ and y -intercepts of $(0, \pm b)$.

Answer **C**.
